

In September we launched Green Shoots as part of our Grenfell **Community Development Fund** to support local projects and people who intend to bring bursts of hope and joy to the community. Since then we've received project applications from organisations throughout North Kensington and we hope to hear from many more of you with one off community ideas such as trips, new pieces of equipment or planting of green spaces.

To find out more about Green Shoots, read our simple guidelines and complete our easy application form **here**.

Projects will usually be for small amounts of between **£250 and £1,000**. You can apply for more than one project a year but normally the maximum awarded to an organisation in any one year will be £1,000.
